REJ-1-VM

Rejection Systems - Push

REJ-1-VM

The system has been designed to reject defective products moving along the production line.

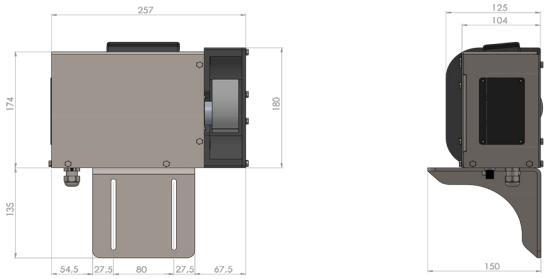

Featuring an eccentric pusher, this rejector guarantees high efficiency while maintaining compact dimensions, making installation quick and easy. It performs fast and precise rejections while keeping the rejected object stable, preventing tipping or production slowdowns.

Since it is not pneumatically driven, it is particularly suitable for environments where a compressed air supply is not available.

Technical Specifications

Power Supply	24 Vdc
Maximum Speed	35 m/minutes
Rejection Stroke	from 120 mm
Power Consumption	0,5 A
